Education

University Of Madras **June 2024-2027**

Bachelor of Science in Computer Science *Thiruvallur,Tamilnadu*

Relevant Coursework

- Web development
- UI/Ux desing
- Artificial Intelligence
- Database Management
- Systems Programming
- Internet Technology
- Software Methodology
- Computer Architecture

Experience

Sri Ram Roofing **June 2026– July 2026**

Account management Intern *Thiruvallur,Tamilnadu*

- Financial Record Management– Maintained financial records, invoices, vouchers, and account-related documents accurately. Ensured proper organization and timely updates for efficient record management. .
- Administrative Documentation Support– Organized files, prepared documents, updated records, and supported daily office operations. Coordinated with the accounts team for smooth workflow and timely task completion. .
- Professional Skills Development – Developed communication, teamwork, time management, and problem-solving skills through real-time office experience. Adapted to workplace procedures and professional ethics .
- Learning Practical Experience – Gained practical experience in a professional environment while learning industry standards and office procedures. Improved confidence, responsibility, and task efficiency. .

Projects

JARVIS – AI Voice-Based Desktop Personal Assistant | *Python, PySide6, Vosk, Piper, Gemini API, Ollama.*

- Developed a voice-controlled Windows desktop assistant with "Hey Jarvis" wake-word activation, supporting both online and offline modes.
- Integrated Vosk (offline speech recognition), Piper TTS, Gemini API, and a lightweight Ollama local model for intelligent voice responses.
- Designed a futuristic PySide6 interface with an animated core, live waveform, and a real-time CPU, RAM, and battery dashboard.
- Implemented a secure command registry with confirmation for sensitive actions, SQLite storage, and a PyInstaller-packaged EXE optimized for 8GB RAM systems.

Project Infinity – AI All-in-One Command Center | *HTML, CSS, JavaScript, Node.js, Gemini API*

- Developed a multi-section AI command center combining an AI chatbot, PDF/image analyzer, code checker, voice interaction, and personal notes.
- Built a smooth, animation-rich responsive interface where every section has its own unique design and transitions.
- Created an activity dashboard that tracks user actions and chat history for a personalized experience.

AI Skin and Body Care Management System | *HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, Gemini API*

- Developed a full-stack AI web application that analyzes an uploaded face photo to detect skin problems and suggest care guidance. .
- Implemented a skincare Q&A feature and an ingredient recommendation module (glycolic acid, hyaluronic acid, kojic acid, etc.).
- Designed a clean, responsive UI with smooth slide transitions, loading effects, and realistic imagery.

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript, node.js,MEAN Stack.
Developer Tools: VS Code, Eclipse, Google Cloud Platform, Android Studio.
Technologies/Frameworks: Git, GitHub, Firebase, Superbase.

Achievements

- Built full-stack web apps using MERN, MEAN, and Flask with REST APIs, authentication, and MongoDB/MySQL.
- Integrated AI features like photo-based skin analysis, fake review detection, and a Gemini-powered weather API.
- Designed a voice-based Windows assistant in Python with wake-word, offline and online modes.
